

## Concrete initiatives

The economic crisis is getting worse and it is spreading more and more. Soon also people and social categories that are still better will suffer it. Also in the more developed countries.

At the same time, war risks and useless consumption compared to the regeneration capacity of nature are going up. If we go on like that, in a few years we will need two planets. And all this happens to satisfy the excesses of a minority and to let starve the overwhelming majority.

This is reality of the present and the logical forecast for the future. All social and economic data lead to this outlook. For decades work has been exploited and wealth has concentrated in few hands. The result is impoverishment of the masses and the decrease in consumption of essential goods.

Money isn't everything, but for thousands of years it's necessary to live. To bear consumption and to go on realizing profits, people have used debt by lending money to the same people to which it has been withdrawn. Now we are at the end of the cycle. To believe in something else is pure illusion.

National states and their international organisations haven't been able to avoid the crisis and they aren't able to solve it. They haven't been able to avoid wars, but on the contrary they have wanted them. They have supported and still support those who have more and they have oppressed those who have nothing, almost everywhere. These are hard facts.

To modify this reality we don't need many words, neither complicated speeches, but clear choices and shared by the overwhelming majority of people.

It's useless protesting. We need to get information and to act. And above all those who are in worse life conditions should do it, by realizing the causes because of which things are like that, while they could be otherwise.

The only way to weather the crisis is to redistribute equally wealth and eliminate exploitation of labour. It's not impossible. It's necessary, possible and just to do it.

We must work all, let work in a productive way, let those who work take part in the risks and in the results of production and acknowledge a just payment for the done work: a minimum to everyone for the responsibilities they take on, a share in proportion to the personal results and a part of the total results. This is the only solution to let people who live bad live better without letting people who live better live bad.

To modify the probable forecasts **a government directly elected by all the inhabitants of the planet and a world people's currency** are necessary.

The **Republic of the Earth** ([www.asmad.org](http://www.asmad.org)) is the democratic system of the inhabitants of the planet that want universal peace and equal distribution of wealth. It's the worldwide government elected directly and at the same conditions by all people that are at least sixteen years old. Only this way peoples will be able to have the authoritativeness to establish peace without violence.

Politics isn't something abstract, but the way people organize society. Political choices must be done for the general wealth and not for a minority. The Republic of the Earth is the only concrete, real and possible answer to obtain this result.

Especially now that all human relations, not only the economic ones, are globalized and concern everybody.

**Dhana** ([www.dhana.org](http://www.dhana.org)) is the currency with real value issued on behalf of workers, which is assigned in equal parts among all the inhabitants of the planet: one hundred Dhana to those who are at least sixteen years old.

Dhana is guaranteed since the issue by capitals of enterprises for a nominal value equal to one gram of fine platinum per Dhana. Nowadays, one hundred Dhana have a value equal to about 2,857 euro or 4,116 dollars.

Dhana is divided into one thousand Kana-Dhana. It is issued in 1, 5, 10, 50, 100 Dhana and 1, 5, 10, 25, 50, 100, 250 and 500 Kana-Dhana denominations.

The Dhana code is DHX. Dhana can be used in unforgeable notes or with the systems [www.akadahana.org](http://www.akadahana.org), [www.gandhana.org](http://www.gandhana.org) and [www.kyberpay.org](http://www.kyberpay.org).

Not more than one hundred Dhana per recipient plus five percent to be addressed exclusively to humanitarian initiatives. This issue limit will cause rapidly an increase in value of Dhana until eighty times (soon one hundred Dhana will have a value equal to 200,000 euro or 300,000 dollars). As a consequence of the increase in value of Dhana, the basic monetary unit will become Kana-Dhana, one thousandth of Dhana. The actual equal redistribution of wealth starts by Dhana.

Republic of the Earth and Dhana are two concrete initiatives of the **Holos Global System** ([www.unigov.org](http://www.unigov.org)) wider programme, by which it will be possible to have more energy, water, food, health, information, wealth, justice and peace for all the inhabitants of the planet. To realize this programme, considerable monetary and financial means, without planning any return for those who have lent them. A summary of Holos Global System is published on [www.hgsweb.org](http://www.hgsweb.org).

**Enter the Republic of the Earth and ask for Dhana as means of payment.** It's the only way to survive and create your future.

**To join** the Republic of the Earth and ask for the allotment of one hundred of Dhana, it's sufficient to fill in and send the participation form from [www.asmad.org](http://www.asmad.org).

Promote, if you can, the Holos Global System programme. It will be demanding and for a few years you will have to run, but it's worth, for you and for everybody.

**To take part in** the Holos Global System programme, it's sufficient to fill in the application on [www.projeos.org](http://www.projeos.org).

Republic of the Earth, Dhana and Holos Global System are real and concrete initiatives that start from the bottom, from people, not certainly from the elite. They are initiatives studied and offered by honest people, who have the only purpose to improve the conditions of humanity and of the entire planet, without claiming supremacies and without planning personal advantages. They do it only because they feel the obligation to do it for the good of all.

Thank you for the attention.
