

To the attention of the Newspaper Editor.

September 28, 2006

Dear Editor,

It's several years we've been sending your Newspaper our news and documents, via fax or e-mail. For your convenience will make a brief summary. The «Untitled» video (www.ipsy.org) we started with. Péntakos (www.pentakos.org) setting a series of solutions. Holos Holding S.A. (www.holosh.org) indicating the resources available. Holos Global System (www.hgsp.org), a program of concrete initiatives to face the most felt and urgent problems of humanity. Holos Bank (www.holosbank.org), the body managing the resources to carry out the Holos Global System program, and Holos Code (<http://holos.infinology.net/holosbank.com/unigov/holos%20code%20en.htm>). The Republic of the Earth (www.asmad.org), a worldwide government system elected directly by the inhabitants of the planet (around the end of December the first International Assembly will be elected). Dhana (www.dhana.org), the first worldwide currency with real value as alternative to legal tender currencies, which, as you know, are completely devoid of value. Dhura (www.dhura.org), the body to issue and control the monetary system of Dhana. Akadhana (www.akadhana.org), for the management of telematic Dhana. Gandhana (www.gandhana.org), an electronic cash box allowing the transfer of currency amounts via ether. Balaloka (www.balaloka.org), the Republic of the Earth security force. Planet Inhabitants Fund (www.planetfund.org) and Earth Inhabitants Justice Authority (www.eija.org). Kyberpay (www.kyberpay.org), the first multi-currency cybernetic payment system.

We also sent a synthesis of the initiatives (www.hgsweb.info) and we indicated numerous texts (<http://www.unigov.org/parse.cgi?f=2&l=eng>), among these «Future» (www.bhavisya.org), and a lot of news (<http://www.unigov.org/parse.cgi?f=1&l=eng>), often in your language.

We understand the incredulity of journalists and of their directors when the news don't cost anything and arrive without striving for them. And we know people telling the truth of facts without emphasizing their opinion can be bothering. We believe you would like to tell the real facts of society, economy, politics and also about wars, but we know that the ownership of the newspaper steers the editorial line «pro domo sua». We are convinced you would like people to know the truth of facts, while you are forced, for economic reasons or ideological choice, to inform about «the truth that can be said», because people mustn't know more than what is useful to control them. Also this is absolute truth.

Therefore great attention is dedicated to marginal facts and different high general interest events are discriminated. The strategy used is as subtle as it's dangerous: you tell the truth about lots of facts and you keep quiet about the ones that, if people were informed they would act spontaneously to change them. This way, the majority of the people ignore lots of things and it's easier to control them and drive them better: about consumption, life styles and political choices. And because information is power, the content of the information depends on the interests of those with more power.

Dear Editor, the full freedom of information is a serious problem. You are certainly aware of this. You know well that empires fell down and that effective alternatives to them haven't been found both because of limited information. You know we are on the edge of a precipice scientists and researchers don't hesitate describing as «crucial limit». And they believe and demonstrate that if we don't change, within 2010 the situation will be irreversible and will drag down male and females, young and old, poor and rich, powerful and common people: 6.5 billion human beings.

What do we need to change? Tell us, write it, and we will do everything we can to remove the causes preventing full information freedom and inducing to compromise the duty to inform. The resources to be addressed to the Holos Global System can't be addressed to other aims but if it's the case of making money available in order to make information complete and objective, we can find a solution swiftly. With other resources. The needed ones. There are many ways of intervening. The only thing you mustn't ask us is to apply for advertising because, also in this, we don't like to do as the others do.

There we are, we wanted you to know you can decide to face reality for what it is, instead of waiting for it to get worse. We would be pleased if could give use your kind receipt.

With our best regards.

Rodolfo Marusi Guareschi, president.
